**NEW PRODUCT****Sodium Perfluoro-1-dodecanesulfonate**

The ubiquitous nature of perfluoroalkylsulfonates and their detection in biotic and abiotic matrices have resulted in the need for certified reference standard solutions. Although many perfluoroalkylsulfonate standards are now available, in both native and mass-labelled forms, a need still exists for longer chain sulfonates. In response to this, **Wellington** has synthesized sodium perfluoro-1-dodecanesulfonate, **L-PFDoS**. This reference standard extends our existing inventory of native perfluoroalkylsulfonates and provides analytical laboratories with an additional option for their analyses.
