Dechlorinated *anti*-Dechlorane Plus®

Dechlorane Plus® (DP), an additive polychlorinated flame retardant with a variety of applications, has been detected as an environmental contaminant on a global scale. Due to rising concerns regarding the presence of DP and its related compounds in environmental samples, **Wellington** has expanded our DP product line to include additional certified reference standards for dechlorinated *anti*-DP (**axCI11DP** and **axxCI10DP**).
